

Pre-rollout announcement

Changes coming to USAi!

We're happy to announce that USAi will be rolling out its improved Chat product to [agency] on [date]! What this means for you:

- You can continue to access USAi at [agency].usai.gov. If you have links that go directly to Chat, starting on [date], these will be redirected to the new link: [agency].usai.gov/chat.
- There may be some disruptions to USAi on [date] during the rollout.
- Chat records from the earlier version will **not** be migrated to the new system, but you will still be able to access the earlier version and your Chat records at legacy.chat.[agency].usai.gov. This version will not be decommissioned until after September 4, but we encourage you to download any Chat records that you need before then.
- The new Chat brings improvements to web search, document upload, and more. If you have any questions about USAi, contact [agency contacts].

Post-rollout announcement

Reminder: New USAi url, access to legacy USAi Chat

A reminder that our agency has a new url for USAi Chat: [agency].usai.gov/Chat (any old links should still work and will redirect to this). You can still access the old version, including your Chat history, at legacy.chat.[agency].usai.gov through September 4. If you need to retain any Chat records, you may download them from the legacy version.
